

01. EXECUTIVE SUMMARY

Job Recruitment - DOSSIER_95

Target: <http://www.google.com> (url)

Assessment: **HIGH RISK**

This comprehensive dossier outlines the findings of the automated reconnaissance mission. The following intelligence was gathered through non-intrusive observation and multi-source cross-referencing.

02. ANALYSIS METHODOLOGY

The job-recruitment investigation utilizes a multi-layered reconnaissance approach. Initial data acquisition involves the non-intrusive harvesting of public records, DNS entries, and digital footprints associated with the target. Our orchestrator dispatches specialized sub-modules to perform deep analysis on communication channels, infrastructure mapping, and behavioral patterns. Each finding is cross-referenced against global threat intelligence databases to ensure a high confidence score. The final risk assessment is calculated using a weighted algorithm that prioritizes actionable security vulnerabilities over passive informational metadata. This process adheres to strict OSINT operational security standards to maintain the integrity of the investigation.

OPERATIONAL WORKFLOW DIAGRAM

DETAILED FINDINGS

// SEGMENT_02 // RESULTS

03. KEY FINDINGS (10)

HIGH

Missing DKIM - email authenticity cannot be verified

Automated OSINT module finding

HIGH

No social media presence found

Automated OSINT module finding

HIGH

SPF issue: None

Automated OSINT module finding

HIGH

Minimal social media presence - unusual for legitimate company

Automated OSINT module finding

HIGH

Company not found in business registries

Automated OSINT module finding

HIGH

Domain uses catch-all email - accepts any address

Automated OSINT module finding

HIGH

DMARC issue: None

Automated OSINT module finding

HIGH

Suspicious subdomains found: admin.google.com

Automated OSINT module finding

HIGH

No SSL certificate - modern job sites require HTTPS

Automated OSINT module finding

HIGH

No LinkedIn company page found

Automated OSINT module finding

04. RECONNAISSANCE LOGS

```
[RECON] Initializing connection to job-recruitment module...  
[AUTH] Credentials verified for user_id 4  
[DATA] Retrieving intelligence nodes for target: http://www.google.com  
[SYNC] Aggregating 10 security findings...  
[COMP] Synthesis finalized at 2026-05-28T22:00:18.164Z
